

Landon Harl

Software Developer

My name is Landon Harl, I am currently enrolled at *Indian Hills* for software development. I am on my fourth term and will graduate in May of 2024. I currently work at the Ottumwa YMCA part-time while attending school. I plan on getting a job working with either Java or Python when I graduate.

Work Experience:

Member Service:

Ottumwa YMCA

2022 - Present

As a member service employee, my job mainly consists of helping members with any questions they have. I sign people up for memberships, put them into groups such as swim lessons, classes, and youth sports, and make sure they have the best experience they can get at our gym. I am responsible for sending people to the right spot for different departments. I do all of the payments for all of our members. I keep track of the cameras to make sure no one is breaking rules or abusing our equipment.

Flex Worker

Hy-Vee

2022 - 2022

As a flex worker, I did whatever was needed around the store. I ran registers, bagged, assisted customers, fulfilled online orders, and occasionally stocked and faced isles. My main job was the online orders. I would go to my app, and fulfill orders in the least amount of time possible. I would then tag them as complete, and my phone gave me a notification when the shopper arrived. I brought the items out to the shoppers, and started the next order.

Seasonal Retail Sales Associate

Kohl's

2021-2022

My job consisted of cleaning the store. I helped customers and just made the store more presentable.

Stockman

Hobby Lobby

2019-2021

At Hobby Lobby, I mainly cleaned the store everyday and assisted customers. I was usually scheduled 4 hours after school. On days I was scheduled longer, I would stock the store and build overheads as needed for more products to be set out. If someone ordered a big product, I would grab it from the stockroom and carry it out to their car for them.

Education:

Indian Hills, 2022 - Present

Software Development

Indian Hills Community College is a school I am currently enrolled in for software development. I am going for two years to receive my associates degree.

What is software development?
